Global Challenges Summer School - Assessment Tasks

Preparatory work as well as class participation are compulsory for all participants, and will grant 6 ECTS. An evaluation mark is given for class participation.

Students needing 2 extra ECTS, according to the credit transfer system of their home universities, are asked to prepare in addition:

- either a poster/presentation on a chosen topic, to be submitted by June and discussed during the Summer School;

- or a research paper on a chosen topic, to be sent over to the scientific tutor by August.

Beside the 8 ECTS a final evaluation mark will be awarded.

Preparatory work

Due: by the end of June

About 2 months before the Summer Schools starts, participants will receive some papers recommended by the lecturers in preparation to each class activity. Papers will introduce the theme that will be deepened and discussed during the lecture.

This Assessment Task relates to the following Learning Outcomes:

- Gather background information on the topics of the Summer School
- Gain an interdisciplinary perspective on the issues to be discussed in class
- Enhance a sound understanding of the major challenges facing our global world.
Class participation

Due: throughout the Summer School

Students are expected to actively participate in class discussions and to show adequate knowledge of the materials provided by lecturers and the scientific tutor. They are also expected to engage with other students and the tutor during the afternoon sessions (i.e., workshops and debates). The scientific tutor will be constantly present in class and will act as a mediator, also stimulating students’ participation and class debate.

The simple attendance to the tutorial sessions, does not grant the class participation mark.

This Assessment Task relates to the following Learning Outcomes:

- Display a preliminary knowledge and critical understanding of the topics discussed
- Participate actively to class discussions and debates
- Have a sound and multidisciplinary understanding of the current challenges discussed.

Poster/presentation

Due: by the end of June; to be presented during the Summer School

Students who have chosen to get the 2 extra ECTS by preparing a poster/presentation on the chosen topic of the Summer School, will be asked to present their research topic during the summer school for class discussion.

This Assessment Task relates to the following Learning Outcomes:

- Prepare and present a research topic relating to the summer school
- Structure and discuss a coherent and solid line of argument
- Combine the research question with a sound research methodology
- Present either a case study or a comparative study, even if at a preliminary stage
- Include a multidisciplinary perspective through class discussion

Research paper

Due: by the end of August

Participants who have chosen to get the 2 extra ECTS by preparing a research paper, are asked to request the approval on their own essay topic by the scientific tutor during the Summer School.
This is to be a thought-provoking exercise to stimulate students to independently explore in depth one of the topics addressed during the Summer School.

**By the end of July,** each student is required to email in **Word or PDF format** to the scientific tutor a one-page outline of the agreed research topic, methodology, and indicative sources for prior approval.

By the end of August, each student is required to email in Word or PDF format to the scientific tutor the research paper.

Paper length: 2,500 to 3,500 words (excluding footnotes and bibliography).

This Assessment Task relates to the following Learning Outcomes:

- Display a sound knowledge of the selected topic and a critical reflection on lectures and class discussion
- Demonstrate a global and multidisciplinary understanding of the major challenges besetting contemporary states’ economic, social and political foundations
- Structure a research paper potentially ready for publication
- Present and discuss a case study or a comparative study by displaying (preliminary) results
- Be able to make sound recommendations for law and/or policy and/or economic reform, and for further theoretical research.
