MSc in
Behavioural and Applied Economics - BEA
Master of Science in Behavioural and Applied Economics - BEA

BEA offers a solid educational path in Economics, both Micro and Macro, along with the possibility to develop advanced competences in Behavioural or Applied Economics.

In the proposed learning approach, a thorough understanding of theoretical issues is constantly combined with the ability to apply them in real-life situations. This allows students to learn **assess, interpret and communicate economic phenomena** by combining the **economic theory** and the **empirical evidence** in the form of experimental data and observational data.

This approach fosters a fruitful cooperative learning. Students get used to time-pressure situations and, through external activities, internships, and international visiting periods they are provided with skills and competences to drive economic policies and decisions.
Programme overview

**Degree awarded**
Master of Science - “Laurea Magistrale” - in Behavioural and Applied Economics

**Workload**
The total workload for each student is 120 ECTS (European Credit Transfer System)

**Intake**
Late August each year

**Language**
English

Study Plan
The Master covers three main areas of knowledge:

First year courses
- Microeconomics
- Macroeconomics
- Statistics
- Econometrics
- Business Strategy in the Digital Economy
- Performance Analysis and Business Analytics
- Law, Economics and Digital Policy
- Psychology of Decision Making

Second year courses
- Public Policies: Nudging
- Public Policies: Evaluation Methods
- Behavioural Economics – or – Applied Economics
- Data Mining and Statistical Learning – or – Behavioural Finance
- Elective course
- Internship
- IT skills
- Master Thesis
Extra activities are organized for students who want to develop soft skills as well as a creative entrepreneurial attitude:

- The **School of Innovation** of Trento allows students to create their own learning path and be awarded the “Innovation Certificate”
- In the CLab (**Contamination Lab**) students from all departments mix together to develop new companies and startups
- In the **Innovation Olympics** students compete to generate the best ideas and business plans to solve the innovation challenge launched by their sponsor company
- In the **Business theatre** students solve real business cases in a creative way and perform their business solutions on stage

Those activities stimulate students’ entrepreneurial spirit and allow them to apply their knowledge in the real business world.

**Dual Degrees**

Beside the several international mobility opportunities active on this master’s degree, enrolled students can apply for a dual degree programme with:

- Friedrich-Schiller-Universität, Jena (Germany)
- Vytautas Magnus University, Kaunas (Lithuania).
BEA graduates learn to **assess independently** and **provide policy recommendations** and strategic governance for Companies, NGOs and Public organizations at international level. Graduates are also able to monitor and suggest policy corrections and address new development strategies within public and private organizations.

BEA graduates are fit to work as **market analysts** or professional experts with high responsibilities in **multinational corporations**, banks or government institutions, NGOs, as well as **international research institutions** and public administrations, including at **European community** level, and to analyze and evaluate the economic aspects of **international trade**.

BEA graduates are also ready to proceed to a PhD.
